

1.3.17

A TWISTED PAIR, INC.

EF 00000781

Monitoring Proposal

Property: Association of Florida Colleges

Address: 1725 Mahan Drive, Tallahassee, FL 32308

Type of Installation: Service

Proposed Date of Installation: April 2017

Equipment: FACP Compatible Panel – No extra equipment needed

Installation Total: \$0.00

Monthly Monitoring: \$50.00 Plus Tax (month to month contract)

Scope of work: Cellular monitoring of the FACP at the 1725 Mahan Dr.

OK TO PAY

ATP is responsible for programming the existing IP and Cellular communicator located on the FACP to communicate with our Central station. ATP will also test and verify signals with the system with the central station.

Since the FACP has a built-in IP Communicator and an added Cellular unit, AFC is not responsible for providing any phone lines to the FACP. With the IP and Cellular communicators, the FACP will meet the two-path requirement mandated by the C.O.T. The AFC will be responsible for ATP's technician's access to all areas needed to complete the scope of work including mechanical rooms, elevator equipment room, server rooms. Failure to provide these items could result in additional hours incurred by ATP and could be billed to contractor. ATP warrants all work performed and equipment for one year after completion. Work is estimated to be completed during normal business hours.

Email: Louis@atwistedpair-tlh.com

Project Name: 1725 Mahan

Quoted To:
David Schrenk 850-980-7217 dschrenk@myafchome.org

Scope of Work
ATP will permit and install a new fire alarm system using the existing fire alarm system raceways. Due to replacing the existing system we will need to bring your building up to current codes. Or counts include all equipment we feel is needed to complete this, this quote does not include any additional equipment the local AHJ might add during the permitting process. Any added equipment cost will be need to be approved by the customer before the project can start.

Qty	Model Number	Description
1	IPA- 60	60 Point Addressable Fire, Releasing Panel
5	PAD 100-DUCT	PAD 100 Duct Detector, Inc Smoke Head
20	PAD 100-6B	PAD 100 6" Base
